Stress • Muscle Spasms

## WHAT IS CBD? cannabidiol

CBD is a powerful plant extract that has been used for medicinal purposes for thousands of years. CBD is one of at least 113 cannabinoids extracted from a proprietary strain of the hemp plant, not to be confused with the strain used to produce marijuana.

Many leading doctors, scientists and experts in the field believe that combining CBD with the full spectrum of other naturally occurring cannabinoids, terpenes and flavonoids found in this special strain of hemp, may offer a range of measurable health benefits never seen before in the pharmaceutical, food or dietary supplement industries.
